OIT-0502-87

30 July 1987

MEMORANDUM FOR: Deputy Director for Administration

FROM: Edward J. Maloney

Director of Information Technology

SUBJECT: Weekly Report for Week Ending 31 July 1987

1. OIT personnel are continuing to test the mobile secure voice unit in the DCI's car from several areas in the metropolitan Washington area. The testing is being done to determine the reason for unsuccessful attempts to establish communications from the mobile unit in certain areas enroute to, and in proximity of, the DCI's residence. [redacted]

2. Several severe problems were encountered during the evening of 24 July 1987 in OIT's Northside Computer Center which serves DI customers using the Support for the Analysts' File Environment (SAFE) system. The problems followed scheduled changes to the computer hardware. Various pieces of the SAFE system were unavailable to customers for a period of 20.5 hours before full service was restored at 1500 on 25 July. [ ]

3. [ ] nonsecure telephone users encountered problems when attempting to dial Virginia local prefixes 482, 281 and D.C. prefix 557. The problems were corrected by reprogramming the telephone switching equipment with an updated C&P list of extended services which contained these prefixes. [ ]
